TYPE	:	N/A
LOC	:	N/A
DURATION	:	180 Minutes

Unit 2. Advanced_Android_Component

Assignment 1:

Create a gallery photo app that allows users to view a list of images using ViewPager2. The app should allow users to navigate between images by swiping left or right.

- Create a new Android application with a main activity (MainActivity).
- Create a list of sample images or allow users to input paths to images to add to the list.
- Use ViewPager2 to display the images in the list.
- Allow users to navigate between images by swiping left or right on ViewPager2.
- Display a page indicator (e.g., "Image 1/5") to let users know which image they are currently viewing.
- Ensure that your app has a back button or gesture to return from the detailed activity (if you create one).

Objectives:

- Know how to implement ViewPager2

Technical Requirements:

- Must use ViewPager2

Assignment 2:

Create a Orer App that allows users to view a list of food items and place orders.

The app should use RecyclerView/DiffUtil to display the list of food items and allow users to add them to a cart.

- Create a new Android application with a main activity (MainActivity).
- Create a list of sample food items or allow users to input information about food items (name, description, and price) to add to the list.
- Use RecyclerView to display the list of food items in MainActivity.
- Allow users to tap on a food item to view details (name, description, and price) and add it to the cart.

- Display the cart in a separate activity (CartActivity) when users tap on a cart icon or button.
- In CartActivity, display a list of food items added to the cart along with the total price.
- Allow users to remove food items from the cart or confirm the order.

Objectives:

- Know how to implement DiffUtil

Technical Requirements:

- Must use DiffUtil
