Day 6: Service

Assignment 1: Create a music player application that uses foreground service to play music when the app is closed

Layout as shown below:

Technical Requirements:

- Create a layout for the Music Player according to the interface above (does not need to be 100% identical): playlists, Artists, Album, player screen
- Data for the Artists and Album screens can be read from the phone and allows creating playlists Add a close button and handle the notification close event when the user operates
- When the user selects a song on the playlist, it will go to the player screen to play the song
- Handles logic for previous, pause, next buttons...
- Use foreground service to play music when the app is closed and use Notification in the Notification exercise

Estimated Time to complete: 90p
