DURATION	:	150 Minutes

Unit 7. Explore Reactive Programming

Assignment 1: Build a Contact Management App using Rx

Main :

Create a new Android project

Design the user interface for the contact management app. The interface should include a contact list, an "Add Contact" button, a search field, and options for editing/deleting contacts.

Use Rx to perform the following tasks:

- Listen for "Add Contact" events and add new contacts to the contact list.
- Listen for "Edit Contact" events and update contact information in the contact list.
- Listen for "Delete Contact" events and remove contacts from the contact list.

Handle error cases

Optionally:

Use a simple database (e.g., SQLite) to store contact information.

Search for contacts in the list based on name or phone number.

Objectives:

- Know how to implement RXjava, RxAndroid, RxKotlin

Technical Requirements:

- Must use RxJava, RxAndroid, RxKotlin

-- THE END --
