Day 4. ViewGroup

Assignment 1:

Create an app to display a list of books

Objectives:

The objective of this exercise is to create an Android app using RecyclerView to display a list of books. Each book will include a title, author, and an illustrative image.

Technical Requirements:

- Create a new Android project in Android Studio.
- Create a list of books (at least 10 books) in a mock data file (it can be an array or a JSON file).
- Create a RecyclerView to display the list of books.
- Create a data model for the book with attributes such as title, author, and image path.
- Create an Adapter to link the data from the list of books to the RecyclerView.
- Create a layout for each item in the list of books by creating a separate XML layout file (e.g., book_item.xml) to display the information of each book.
- When the user clicks on a book in the list, display the detailed information of the book in a new screen.
- Optionally, implement sorting the list of books by title or author.
- Ensure that your app runs smoothly and is user-friendly.
- (Optional) Add a search feature so that users can search for books by title or author.

Estimated Time to complete: 90 mins
